

My concern on this issue is the haste with which such a drastic change is being enacted. The benefits to owners are readily obvious but the consequences on the control of information to the public -- indeed the consequences for the consumer (pros and/or cons) have scarcely been debated at all. I respectfully request, NAY, I DEMAND, that IN ORDER TO PRESERVE OUR DEMOCRACY all action on this topic be postponed in order to allow time for a more vigorous debate -- one in which members of Congress and the general public clearly wish to engage.
